Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

1. Organization and Nature of Operations

Atlantica Tender Drilling Ltd. (“Atlantica” or the “Company”) was incorporated in Bermuda in September 2008 and in April 2011 became registered on the Norwegian OTC-list under the symbol “ATDL.” Atlantica is in the business of providing contract drilling services for oil and gas wells for the offshore tender assist market and related offshore oilfield services.

The following entities are wholly-owned subsidiaries of the Company:

- Atlantica Management (USA) Inc. (“AM”), incorporated in the state of Texas
- Atlantica International Ltd. (“AI”), a Bermuda-based entity
- BassDrill Beta Ltd. (“BDB”), a Malta-based entity
- BassDrill Beta B.V. (“BDB-BV”), a Holland-based entity
- BassDrill Brasil Servicos de Petroleo Ltda. (“BBB”), a Brazil-based entity
- Atlantica International B.V. (“AI-BV”), a Holland-based entity
- Atlantica (Malta) Holding Ltd. (“AMH”), a Malta-based entity
- Atlantica Gamma Ltd. (“AG”), a Malta-based entity
- Atlantica Delta Ltd. (“AD”), a Malta-based entity
- Atlantica BDA Ltd. (“ABDA”), a Malta-based entity
- Atlantica (Holding) B.V. (“ABV”), a Holland-based entity
- Atlantica Financing B.V. (“AF-BV”), a Holland-based entity

The Company’s primary assets and liabilities currently pertain to *Beta*, owned by BDB, which the Company took delivery of in November 2013 and placed into service under a drilling contract with Petróleo Brasileiro S.A. (“Petrobras”) in March 2014; *Delta*, owned by AD, which the Company took delivery of in December of 2015 and placed into service under a drilling contract with Total Congo E&P (“Total”) in January 2016; and AM.

As used herein, and unless otherwise required by the context, the term “Atlantica” refers to Atlantica Tender Drilling Ltd., and the terms “Company,” “we,” “our,” and words of similar import refer to Atlantica and its subsidiaries. The use herein of such terms as “we,” “us,” “our” and “its,” or references to specific entities, is not intended to be a precise description of corporate relationships.

2. Liquidity

These consolidated financial statements have been prepared in accordance with the applicability of a going concern assumption, which contemplates the realization of assets and the satisfaction of liabilities and commitments in the normal course of business for an extended period of time. The Company’s existing debt agreements, as amended and extended in September 2019 (see Note 5), mature in the third and fourth quarters of 2020. The Company’s existing liquid assets do not meet the needs for this debt repayment obligation; however, the Company plans to restructure its debt obligations and expects a resolution prior to the maturity dates. Consequently, this situation raises substantial doubt about the Company’s ability to continue as a going concern within one year after the date the accompanying consolidated financial statements are available to be issued.

Management’s belief is that the refinancing will be successful and that the new financing, together with forecasted operating cash flow, will be sufficient to enable the Company to meet its obligations as they become due in the ordinary course of business for 12 months following the date these

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

financial statements are issued. This assumes, among other things, that the Company will continue to be successful in implementing its business strategy and that there will be no material adverse developments in its business, liquidity or capital requirements. If one or more of these factors do not occur as expected, it could cause a default under one or both of the existing agreements governing the Company's indebtedness leading to potential insolvency proceedings in Bermuda or the filing for bankruptcy protection in the U.S.

Following the end of the *Delta* contract with Total and the unprecedented situation involving the global COVID 19 pandemic, the Company suspended bond coupon payments and the payments of interest and amortization under the senior bank facility in March 2020. While formal standstill arrangements with the bondholders and senior lenders have expired, the Company remains in dialogue with its financial creditors regarding the way forward and is hopeful that a positive resolution can be found in the near future.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded assets, or the amounts of and classification of liabilities that might be necessary in the event the Company cannot continue in existence.

3. Summary of Significant Accounting Policies

The unaudited interim consolidated financial statements reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results for the interim period on a basis consistent with the annual consolidated financial statements. All such adjustments are of a normal recurring nature.

The accompanying consolidated financial statements and notes thereto should be read in conjunction with the audited consolidated financial statements and notes thereto as of and for the years December 31, 2019 and 2018.

Principles of Consolidation

The consolidated financial statements include the assets and liabilities of Atlantica and its subsidiaries (as described in Note 1). All intercompany balances and transactions have been eliminated in consolidation.

Reclassification

Certain previously reported amounts have been reclassified to conform to the current year presentation. Such reclassifications had no effect on the consolidated net income or cash flows.

Use of Estimates

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses and requires management to disclose contingent assets and liabilities at the date of the consolidated financial statements. While management believes current estimates are reasonable and appropriate, actual results could differ from those estimates.

Fair Value of Financial Instruments

Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, *Fair Value Measurements*, establishes a common definition for fair value to be applied to existing GAAP that require the use of fair value measurements, establishes a framework for measuring fair value and expands disclosure about such fair value measurements. GAAP defines fair

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy categorizes assets and liabilities measured at fair value into one of three different levels depending on the observability of the inputs employed in the measurement. The three levels are defined as follows:

Level 1 - Observable inputs such as quoted prices in active markets at the measurement date for identical, unrestricted assets or liabilities.

Level 2 - Other inputs that are observable directly or indirectly such as quoted prices in markets that are not active, or inputs which are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 - Unobservable inputs for which there is little or no market data and which the Company makes its own assumptions about how market participants would price the assets and liabilities.

The Company's fair value of financial instruments disclosure is based upon information available to management as of June 30, 2020 and December 31, 2019. Considerable judgment is necessary to interpret market data and develop estimated fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize on disposition of the financial instruments. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The Company's financial instruments consist mainly of cash and cash equivalents, restricted cash, accounts receivable, accounts payable, accrued liabilities, interest rate swaps, foreign currency exchange rate swaps and long-term debt. The carrying values for cash and cash equivalents, restricted cash, accounts receivable, accounts payable and accrued liabilities approximate their fair value, principally due to the short-term nature of these instruments. The carrying value of the Senior Secured Term Loan approximates fair value as the interest rate is re-determined regularly based on current interest rates. The fair value of the Senior Secured Bonds at June 30, 2020 and December 31, 2019 was approximately \$67.8 million and \$119.3 million, respectively, based on quoted market prices, Level 1 in the fair value hierarchy. The fair value of the interest rate swaps and foreign currency exchange rate swaps are recorded at fair value at each reporting period based on indirect market prices, Level 2 in the fair value hierarchy (see Note 12).

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents.

Restricted Cash

The Senior Secured Term Loan and Senior Secured Bonds (see Note 5) require the Company to maintain a debt service account, into which one-third of the next quarterly interest and installment payments are to be paid each month.

Concentrations of Credit Risk

The Company's customer concentration may impact its overall credit risk, either positively or negatively, in that customers may be similarly and concurrently affected by changes in economic or

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

other conditions affecting the drilling industry. The Company's percent of revenue by major customer is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Total	35%	64%	48%	62%
Petrobras	65%	36%	52%	38%

The Company is subject to concentrations of credit risk with respect to cash and cash equivalents, which the Company attempts to minimize by maintaining cash and cash equivalents with major, high-credit quality financial institutions. At times cash and cash equivalents balances may exceed limits federally insured by the United States Federal Deposit Insurance Corporation or other similar government institutions in other countries. Additionally, certain of the Company's cash and cash equivalents balances are maintained in foreign banks, which are not covered by deposit insurance. The Company has not experienced any losses on its cash and cash equivalents.

Foreign Exchange Transactions

The Company's functional currency is the United States (U.S.) dollar as the Company primarily contracts with contractors, finances capital, and purchases equipment and services using the U.S. dollar. Transactions that are completed in a foreign currency are re-measured into U.S. dollars, and any gain or loss is recorded in the consolidated statements of operations.

Inventory

Inventory is carried at the weighted average purchase price less an allowance for obsolescence. The allowance for obsolescence is based on historical experience and expectations for future use of inventory. At June 30, 2020 and December 31, 2019, the allowance for obsolescence was \$11.9 million and \$5.5 million, respectively.

Property and Equipment

Property and equipment is carried at cost less accumulated depreciation and amortization. The Company capitalizes expenditures for renewals, replacements and improvements, and expenses costs of maintenance and repairs as incurred. Depreciation on property and equipment is calculated on the straight-line method over the estimated useful lives of the assets. Depreciation and amortization expense was \$4.2 million and \$6.6 million for the three months ended June 30, 2020 and 2019, respectively, and \$13.3 million and \$13.2 million for the six months ended June 30, 2020 and 2019, respectively.

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

The estimated useful lives are defined below:

Drilling rigs and equipment:	
Barge and related marine equipment	30 years
Mast equipment package	5 - 7 years
Other (drill string, engine overhauls, etc.)	2 - 5 years
Leasehold improvements	Remaining life of lease
Furniture and office equipment	3 - 5 years
Computer hardware and software	3 years
Vehicles	5 years

Capital Spares

Capital spares are not subject to depreciation until put into use on the rigs.

Rig Certifications

The Company is required to obtain certificates from various regulatory bodies in order to operate its drilling rigs. The costs incurred to obtain and maintain these certifications (inspections, tests, surveys, etc.) are capitalized in other assets and amortized over the corresponding certification period with amortization recorded as a component of operating expense.

Impairment of Long-lived Assets

Long-lived assets, such as property, plant, and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset to be tested for possible impairment, the Company first compares undiscounted cash flows expected to be generated by an asset to the carrying value of the asset in accordance with ASC 360, *Property, Plant and Equipment*. If the carrying value of the long-lived asset is not recoverable on an undiscounted cash flow basis, impairment is recognized to the extent that the carrying value exceeds its fair value. Fair value is determined through various valuation techniques, including discounted cash flow models, quoted market values and third party appraisals, as considered necessary.

Income Taxes

The Company is a Bermuda limited liability company. Bermuda does not impose corporate income taxes unless activities are carried out in Bermuda. No activities were carried out in Bermuda during the three and six months ended June 30, 2020 and 2019. Consequently, the Company has provided for income taxes based on the laws and rates in effect in the countries in which operations are conducted, or in which the Company and/or its subsidiaries are considered resident for income tax purposes. The Company and/or its subsidiaries operate in multiple countries under different legal forms. As a result, the Company is subject to the jurisdiction of numerous domestic and foreign tax authorities, as well as to tax agreements and treaties among these governments. The Company's operations in these different jurisdictions are taxed on various bases including, actual income before taxes, deemed profits (which are generally determined by applying a tax rate to revenues rather than profits) and withholding taxes based on revenue. Determination of taxable income in any jurisdiction requires the interpretation of the related tax laws and regulations and the use of estimates and assumptions regarding significant future events, such as the amount, timing and character of deductions, permissible revenue recognition methods under the tax law and the sources and character of income and tax credits. Changes in tax laws, regulations, agreements and treaties, foreign currency exchange

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

restrictions or the Company's level of operations or profitability in each tax jurisdiction could have an impact upon the amount of income taxes that the Company provides during any given year.

Below are the components of the Company's income tax expense for the three and six months ended June 30, 2020 and 2019:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Current income tax expense	\$ 1,137,137	\$ 2,735,129	\$ 3,214,121	\$ 5,558,100
Deferred income tax expense	-	705,000	-	705,000
Income tax expense	<u>\$ 1,137,137</u>	<u>\$ 3,440,129</u>	<u>\$ 3,214,121</u>	<u>\$ 6,263,100</u>

The Company accounts for income taxes under the asset and liability method, which requires the recognition of deferred tax assets and liabilities for the expected future tax consequences. Deferred tax assets and liabilities are based on temporary differences that arise between the carrying value of the financial statements and tax bases of assets and liabilities. At June 30, 2020 and December 31, 2019, the Company recorded a \$1.3 million deferred tax asset with a full valuation allowance for a net \$-0- million deferred tax position. The Company recorded a full valuation allowance due to the Company's inability to realize the asset under a going concern (see Note 2). The deferred tax position represents the tax effect of the temporary difference related to assets owned by subsidiaries in Malta based on tax rates due on distributable earnings.

The Company follows guidance issued by the FASB which clarifies accounting for uncertainty in income taxes by prescribing the minimum recognition threshold an income tax position is required to meet before being recognized in the consolidated financial statements and applies to all income tax positions. Each income tax position is assessed using a two-step process. A determination is first made as to whether it is more likely than not that the income tax position will be sustained, based upon technical merits, upon examination by the taxing authorities. If the income tax position is expected to meet the more likely than not criteria, the benefit recorded in the financial statements equals the largest amount that is greater than 50% likely to be realized upon its ultimate settlement.

The Company believes that it has no uncertain income tax positions and that there are no tax positions taken or expected to be taken that would significantly increase or decrease unrecognized tax benefits within the next twelve months.

In accordance with this guidance, the Company will record income tax related interest and penalties, if applicable, as a component of the provision for income tax expense. However, there were no amounts recognized for income tax related interest and penalties in the consolidated statements of operations for the three and six months ended June 30, 2020 and 2019.

Earnings (Loss) Per Share

Basic earnings (loss) per share ("EPS") is calculated based on the income (loss) for the period available to common stockholders divided by the weighted average number of shares outstanding for basic EPS for the period. Diluted EPS includes the effect of the assumed conversion of potentially dilutive instruments. The determination of dilutive earnings per share requires the Company to potentially make certain adjustments to the weighted average shares outstanding used to compute basic earnings per share unless anti-dilutive.

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

Recently Issued Accounting Standard

In February 2016, the FASB issued ASU 2016-02, *Leases* ("ASC 842"), to increase transparency and comparability among organizations by recognizing lease assets and liabilities on the balance sheet and disclosing key information about leasing arrangements. ASU No. 2016-02 is effective for financial statements issued for fiscal years beginning after December 15, 2020, and early adoption is permitted. The Company is evaluating the impacts of this ASU on its financial statements.

4. Property and Equipment

Property and equipment consisted of the following:

June 30, 2020	Beta Rig	Delta Rig	Other	Total

Long-Term Debt, Net	\$ -	\$ -

In March 2020, due to the uncertainties of the impacts of COVID-19, the Company took measures to preserve its liquidity position. The Company entered into stand-still agreements for the Term Loan

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

and the Bonds that expired May 31, 2020. Under the stand-still agreements, interest and principal payments were suspended for both the Senior Secured Term Loan and Senior Secured Bonds. The Company continues to act under the expired stand-still agreement while discussions continue with the creditors to find an acceptable solution. If an agreement cannot be reached, it is possible that the Company may be required to seek creditor protection via insolvency proceedings in Bermuda or the filing for bankruptcy protection in the U.S.

At June 30, 2020, the Company included accrued interest of \$2.7 million for the Senior Secured Term Loan and \$8.6 million for the Senior Secured Bonds in Accrued liabilities.

Senior Secured Term Loan

In October 2014, the Company entered into a Senior Secured Term Loan ("Term Loan"), originally maturing in August 2019 and bore interest at 3.25% plus LIBOR, payable quarterly. In September 2019, the Term Loan was amended and extended to mature in September 2020 and (effective September 19, 2019) bears interest at 4.75% plus LIBOR for the first six months of the extension and increasing 0.5% every six months thereafter. At June 30, 2020, the interest on the Term Loan was approximately 6.7%. The Term Loan is collateralized by a first lien mortgage on *Beta* and *Delta*; the shares of BDB, BDB-BV, BBB, AG and AD; the AM management agreements; all credit rights arising from the Company's drilling contracts; and rights in connection with the investments made with amounts deposited in the debt service reserve account (see Restricted Cash in Note 3). The Term Loan requires quarterly principal payments of \$7.5 million that commenced October 2019, with a balloon payment of \$71.4 million at final maturity.

As amended, the Term Loan requires sweep repayments if the Company's free and unencumbered cash balance, exclusive of the minimum free cash requirement, exceeds \$10.0 million, and requires a prepayment of the loan for any amounts received upon the receipt of the Petrobras rate adjustment associated with the withholding income tax change (see Note 9).

In order to minimize its exposure to the floating interest rate on the Term Loan, the Company entered into interest rate swaps to effectively obtain a fixed rate on a portion of the Term Loan. At June 30, 2020, the Company hedged \$59.2 million, or 68%, of the Term Loan balance with an effective fixed LIBOR of 1.25%.

At June 30, 2020, the Term Loan further required the Company to comply with certain financial covenants as noted below. These covenants are required to be tested and reported quarterly (except as noted):

- Interest coverage ratio of not less than 2.5 : 1.0
- Debt service coverage ratio of not less than 1.1 : 1.0
- Book equity minimum of \$155.0 million
- Equity ratio of minimum 0.3 : 1.0
- Liquidity, measured as freely available and unencumbered cash, the higher of \$10.0 million or 5% of the outstanding interest-bearing debt (\$11.1 million at June 30, 2020)
- Positive working capital, excluding the minimum liquidity requirement discussed above
- The combined market value of the vessels is at least 200% of the aggregated outstanding amount of the Term Loan (reporting required semi-annually).

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

At June 30, 2020, the Company was in compliance with all financial covenants, except the minimum book equity and equity ratio. The Company is in dialogue with the creditors to restructure the Term Loan and Bonds (see discussion above).

Senior Secured Bonds

In April 2013, the Company issued \$75.0 million of Senior Secured Bonds (“Original Bonds”), originally maturing in April 2018 and collateralized by *Beta*. The Bonds bore interest at 8.5%, with semiannual interest payments that commenced October 24, 2013, with principal due at maturity.

On September 23, 2014, the Company issued an additional \$75.0 million of Senior Secured Bonds (“New Bonds”), originally maturing in September 2019. Concurrent with the issuance of these New Bonds, the holders of the Original Bonds agreed to amend and restate the bond agreement to be consistent with the bond agreement of the New Bonds. The Original Bonds and New Bonds, (together the “Bonds”) bore interest at 8.0%.

In September 2019, the Bonds were amended and extended to mature in October 2020 and (effective September 24, 2019) bear interest at 12%, with quarterly interest payments. The Bonds require repayment at 102% of par value upon maturity, or at premium ranging between 101% to 101.25% for early settlement. The Bonds are collateralized by *Beta* and *Delta*; the shares of BDB, BDB-BV, BBB, AG and AD; the AM management agreements; all credit rights arising from the Company’s drilling contracts; and rights in connection with the investments made with amounts deposited in the debt service reserve account (see Restricted Cash in Note 3). The Bonds are subordinated to the Term Loan.

At June 30, 2020, the Bonds further required the Company to comply with certain financial covenants as noted below. These covenants, are required to be tested and reported quarterly (except as noted):

- Interest coverage ratio of not less than 2.5 : 1.0
- Debt service coverage ratio of not less than 1.1 : 1.0
- Book equity minimum of \$155.0 million
- Equity ratio of minimum 0.3 : 1.0
- Liquidity, measured as freely available and unencumbered cash, the higher of \$10.0 million or 5% of the outstanding interest-bearing debt (\$11.1 million at June 30, 2020)
- Positive working capital, excluding the minimum liquidity requirement discussed above
- The combined market value of the vessels is at least 200% of the aggregated outstanding amount of the Term Loan (reporting required semi-annually).

At June 30, 2020, the Company was in compliance with all financial covenants, except the minimum book equity and equity ratio. The Company is in dialogue with the creditors to restructure the Term Loan and Bonds (see discussion above).

Deferred Financing Costs

Amortization of debt issuance costs and other related financing costs, included within interest expense, totaled \$1.0 million and \$0.7 million for the three months ended June 30, 2020 and 2019,

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

respectively, and \$2.0 million and \$1.4 million for the six months ended June 30, 2020 and 2019, respectively.

Accretion of Bond Premium

As discussed above, the Bonds will be settled at a premium under the terms of the September 2019 bond amendment. The Company recorded additional interest expense of \$0.6 million and \$1.2 million associated with this premium for the three and six months ended June 30, 2020, respectively.

6. Stockholders' Equity

As a condition of the September 2019 Bond amendment and extension (see Note 5), the Company completed an equity raise of \$4.9 million, net in October 2019. The proceeds were used to fund a Senior Secured Bond interest escrow account to cover additional interest expense on the bonds through June 2020 and for general corporate purposes.

7. Revenue from Contracts with Customers

The Company's revenue derives from drilling contract activities that include (i) providing and operating tender assist drilling rig, (ii) moving the rig to (mobilization) and off (demobilization) location and (iii) reimbursement of certain supplies, equipment and personnel services requested by the customer. These services are deemed to be a single performance obligation under the contract and satisfied over a series of service periods.

Contract Drilling

Contract drilling revenue is based on contracted day-rates and the number of operating days during the period. As part of the single performance obligation of the contract, this day-rate consideration is recognized as services are performed.

The Company receives reimbursement from customers for the purchase of supplies, equipment, personnel services and other services requested by the customer. The Company is considered a principal in these transactions and records revenues and the corresponding costs as goods and services are rendered.

Mobilization and Demobilization Revenue

In connection with a customer contract, the Company may receive lump-sum fees for the mobilization of equipment offset by any liquidated damages incurred due to late delivery of the rig. This performance obligation is part of the single performance obligation identified in the contract and is allocated to the overall single performance obligation. Accordingly, mobilization fees and costs incurred to mobilize a rig from one geographic market to another are deferred and recognized on a straight-line basis over the initial term of such contract, excluding any option periods.

The Company may also receive lump-sum fees for demobilization of equipment and personnel upon completion or termination of the contract. This performance obligation is part of the single performance obligation identified in the contract and is allocated to the overall single performance obligation. Demobilization fees are recorded as revenue over the initial term of the contract.

The Company recognized amortization of mobilization and demobilization revenue related to *Atlantica Delta* of \$21,000 and \$2.2 million for the three months ended June 30, 2020 and 2019,

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

respectively, and \$0.8 million and \$4.4 million for the six months ended June 30, 2020 and 2019, respectively.

As of June 30, 2020 and December 31, 2019, the Company had a total deferred revenue liability of \$0 million and \$0.7 million, respectively, for collected fees associated with mobilization. At June 30, 2020 and December 31, 2019, the Company had an asset of \$1.0 million in other current assets related to the amortization of demobilization revenue.

Accounts Receivable

The Company's receivables are generated from services to international oil companies and government-owned or government-controlled companies. The Company does not require collateral or other security to support customer receivables.

The Company's customers include a large international oil and gas operator and a national oil company. The Company's drilling contracts provide for monthly billings, and payment is usually made within 30 - 60 days. The Company establishes an allowance for doubtful accounts on a specific identification method, considering changes in the financial position of a customer, when the Company believes the payment of a receivable is unlikely to occur. There was no allowance for doubtful accounts at June 30, 2020 and December 31, 2019.

Accounts receivable also include estimates of the Company's contract drilling revenue earned during the period, but unbilled at the end of the period. At June 30, 2020 and December 31, 2019, accounts receivable included \$7.7 million and \$7.5 million of accrued revenues, respectively. At June 30, 2020, the Company included \$8.4 million in billed accounts receivable related to the Petrobras rate adjustment for tax law changes (see Note 9) which is expected to be settled by January 2021.

8. Earnings (Loss) Per Share

The components of the numerator and denominator for the calculation of basic and diluted earnings (loss) per share are as follows for the three and six months ended June 30, 2020 and 2019:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2020	2019	2020	2019
Numerator:				
Net income (loss)	\$ (6,385,374)	\$ (870,084)	\$ (3,264,817)	\$ 5,962,137
Denominator:				
Weighted-average shares outstanding - basic and diluted	302,199,264	252,199,264	302,199,264	252,199,264
Earnings (loss) per share - basic and diluted	\$ (0.02)	\$ (0.00)	\$ (0.01)	\$ 0.02

9. Commitments and Contingencies

Petrobras Rate Adjustment for Tax Law Changes

In September 2010, the Company entered into the Petrobras contract in which the payments made by Petrobras to the Company were subject to withholding income tax ("WHT") at a zero rate. Subsequently, the Brazil tax regime changed such that 15% of Petrobras payments are now subject to WHT. The Petrobras contract includes a clause that states if a change in taxes causes an increase in the burden of the Company, then the original contract rate shall be increased proportionally to cover the additional tax burden. The Company has demonstrated the increased burden. As required by the contract, the Company sent a notice of dispute to Petrobras in February 2019 informing Petrobras that it would submit the dispute to arbitration in order to recover the sum of approximately \$6.0 million.

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

The Company subsequently filed for arbitration in April 2019. In 2020, Petrobras agreed to a settlement of \$8.4 million related to the WHT to be paid in January 2021. The Company recorded the WHT settlement of \$8.4 million in Accounts Receivable at June 30, 2020 and December 31, 2019.

Construction Obligations

In October 2012, AG entered into a turn-key construction contract with Dalian Shipyard Building Industry Co. and Dalian Shipbuilding Industry Offshore Co. Ltd (together "DSIC") for a tender support barge (*Atlantica Gamma*). AG made a refundable 15% installment payment of \$18.6 million in October 2012. *Atlantica Gamma* was to be delivered on or before July 15, 2015 (the "Delivery Date"), and if the delivery was delayed beyond 180 days from the Delivery Date, absent any permissible delays as defined in the construction contract, AG was *inter alia* entitled to terminate the contract.

In January 2016, AG cancelled the contract and submitted a claim for the refund of the \$18.6 million down payment made to the shipyard in 2012. DSIC refuted AG's cancellation of the contract and in March 2016 cancelled the construction contract citing breach of contract by the Company. As a result of the cancellation, the Company reclassified the down payment of \$18.6 million from construction in progress to long-term deposits on the consolidated balances sheet as of December 31, 2017. As required by the construction contract terms, the dispute was heard by an arbitration tribunal in London (UK) in February/March of 2018. In May 2018, the arbitration tribunal's award fell in favor of DSIC, ruling that AG did not have the right to cancel the construction contract and was not entitled to the refund of the \$18.6 million down payment.

In the fourth quarter of 2018, DSIC filed an additional claim in arbitration against AG for an additional \$82.7 million related to the cancelled *Atlantica Gamma* construction contract. AG is a special purpose entity that is in the process of being voluntarily liquidated and has no significant assets to pay any such claim. Neither the Company or any of its subsidiaries have issued any guarantee to DSIC or any other company in relation to the AG construction contract, and as a result, the Company, based upon the advice of legal counsel, does not believe that this claim will have a material adverse effect on the financial condition or results of operations of the Company.

Contingencies

The Company may in the future be party to various legal proceedings that are incidental to the ordinary course of business. The Company regularly analyzes current information and, as necessary, provides accruals for probable liabilities on the eventual disposition of these matters. As of June 30, 2020, there were no threatened or pending legal matters that would have a material impact on the Company's consolidated financial statements.

10. Defined Contribution Retirement Plan

The Company maintains a defined contribution plan for all employees based in the United States. Under the plan, the Company contributes to the employee's retirement plan amounts ranging between one and six percent of the employee's annual salary. Such contributions were \$37,000 and \$48,000 for the three months ended June 30, 2020 and 2019, respectively, and \$110,000 and \$98,000 for the six months ended June 30, 2020 and 2019, respectively.

11. Related Party Transactions

The Company transacted business with the following related parties:

- HitecVision Advisory AS ("HitecVision")

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

- Bassoe Offshore AS/Bassoe Offshore USA (“Bassoe”) (related party through September 30, 2019)

Commission Fees

The Company paid a commission of 1.25% of the revenue received from Petrobras to Bassoe. In June 2019, the Company and Bassoe terminated the commission fee arrangement for a lump sum payment of \$750,000.

Accounts Receivable and Accounts Payable

The Company had the following receivable and payable balances with related parties:

	June 30, 2020	December 31, 2019
Employee receivable	\$ 6,263	\$ -
Accounts receivable - related parties	\$ 6,263	\$ -

	June 30, 2020	December 31, 2019
HitecVision	\$ 11,583	\$ 64,479
Other	-	7,616
Accounts payable - related parties	\$ 11,583	\$ 72,095

12. Risk Management and Financial Instruments

The majority of the Company’s revenue transactions, assets and liabilities are denominated in U.S. dollars, the functional currency of the Company. However, the Company has operations and assets in a number of countries worldwide and incurs expenditures in other currencies, causing its results from operations to be affected by fluctuations in currency exchange rates, primarily relative to the U.S. dollar. The Company is also exposed to changes in interest rates on floating interest rate debt. There is, thus, a risk that currency and interest rate fluctuations will have a negative effect on the value of the Company’s cash flows.

Interest Rate Risk Management

The Company’s exposure to interest rate risk relates mainly to its floating interest rate debt and balances of surplus funds placed with financial institutions. The Company’s intention is to obtain the most favorable interest rate available. Surplus funds are generally placed in deposits in banks. Such deposits are available daily in order to provide the Company with flexibility to meet all requirements for working capital and capital investments. The extent to which the Company plans to utilize interest rate swaps and other derivatives to manage its interest rate risk will be determined by the net debt exposure and its views on future interest rates.

The objective of the interest rate swaps is to manage interest rate risk exposure on variable interest rate debt arrangements such as the Term Loan debt arrangement (see Note 5). The interest rate swap agreements effectively modify the Company’s exposure to interest rate risk by converting a portion of the variable-rate debt to a fixed rate, thus reducing the impact of the interest rate changes on

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

future interest expense. The Company has not designated these interest rate swaps as hedges and does not apply hedge accounting to its interest rate derivative instruments. At June 30, 2020 and December 31, 2019, the Company had interest rate swaps with total notional amounts of \$59.2 million and \$70.4 million, respectively, that fixed the variable rate on the Term Loan between 1.11% and 1.31%.

At June 30, 2020 and December 31, 2019, the Company valued the interest rate swaps as a net liability of \$0.9 million and a net asset of \$0.6 million, respectively. The Company determined the fair value of the interest rate swaps based on indirect market prices and accordingly classified such fair value measurement as Level 2. For the three months ended June 30, 2020 and 2019, the Company recognized \$0.2 million and \$1.7 million of interest expense, respectively, and \$1.5 million and \$2.6 million of interest expense for the six months ended June 30, 2020 and 2019, respectively, associated with the mark to market on its interest rate derivatives.

Foreign Currency Rate Risk Management

The Company entered into foreign currency exchange rate hedges to manage foreign currency rate risk exposure on its transactions incurred in Brazilian Reals and the Euro. In December 2019, the Company entered into a one year put agreement to effectively limit the Brazilian Reals exchange rate to BRL3.90 per USD1.00 on BRL4.0 million per month. In October 2018, the Company entered into a one-year foreign currency exchange rate swaps that effectively locked in the foreign exchange rate of BRL 5,000,000 each month through mid-September 2019 at an average exchange rate of BRL3.76 per USD1.00. In February 2020, the Company entered into an eight-month put agreement to effectively limit the Euro to USD\$0.87 per EUR1.00. At June 30, 2020 and December 31, 2019, the Company valued the foreign currency hedges as a current asset of \$41,000 and \$0.2 million, respectively. For the three months ended June 30, 2020 and 2019, the Company recognized \$10,000 of foreign currency losses and \$0.2 million of foreign currency gains, respectively, associated with the mark to market on its foreign currency exchange rate hedges. For the six months ended June 30, 2020 and 2019, the Company recognized \$0.1 million of foreign currency losses and \$0.4 million of foreign currency gains, respectively, associated with the mark to market on its foreign currency exchange rate hedges. The Company determined the fair value of the foreign currency exchange rate swaps based on indirect market prices and, accordingly, classified such fair value measurement as Level 2.

13. Subsequent Events

The Company has evaluated events subsequent to June 30, 2020 through August 13, 2020, the date these consolidated financial statement were available for issuance, and identified no events to be recognized or disclosed in the accompany consolidated financial statements other than those disclosed herein.

In March 2020, the World Health Organization (“WHO”) classified the COVID-19 outbreak as a pandemic based on the rapid increase in exposure globally and the risks posed to the international community. In response, governments around the world imposed travel restrictions and stay at home orders to mitigate the risks of the pandemic. Government action to impose travel bans, quarantines and entry restrictions have caused difficulties getting personnel to and from the rigs. The *Delta* was under a reduced standby rate in April and May 2020 and has started demobilization under the Total contract. The *Beta* operations have been suspended under a long-term standby rate for an indefinite period of time starting in June 2020. The Company considered the effect of COVID-19 on the assumptions and estimates used in the preparation of these unaudited consolidated financial

Atlantica Tender Drilling Ltd. & Subsidiaries

Notes to Consolidated Financial Statements

statements and determined that there were no material adverse effects on the Company's results of operations and financial position at June 30, 2020 due to the aforementioned events.

Due to the uncertainties of the impacts of COVID-19, the Company suspended bond coupon payments and the payments of interest and amortization under the senior bank facility in March 2020. While formal standstill arrangements with the bondholders and senior lenders have expired, the Company remains in dialogue with its financial creditors regarding the way forward and is hopeful that a positive resolution can be found in the near future.

The duration of the COVID-19 pandemic and its impact to the global economy cannot be predicted. Therefore, the Company can give no assurances that the spread of COVID-19 will not have a material adverse effect on its financial position or results of operations in 2020 and beyond.

In March 2020 the "Coronavirus Aid, Relief, and Economic Security (CARES) Act" was signed into law. The CARES Act, among other things, includes provisions relating to refundable payroll tax credits, deferment of employer side social security payments, net operating loss carryback periods, alternative minimum tax credit refunds, modifications to the net interest deduction limitations, increased limitations on qualified charitable contributions, and technical corrections to tax depreciation methods for qualified improvement property.

The Company will continue to examine the impact that the CARES Act may have on the business. Currently, management is unable to determine the impact that the CARES Act will have on the financial condition, results of operations, or liquidity.
