

QUALITY ENTERPRISE POLICY

Atlantica is a tender assist drilling contractor that is firmly committed to the underlying principles and benefits of maintaining a Quality Enterprise Management System, or QE-MS, that is fully compatible with the current requirements of ISO 9001:2015.

The QE-MS is subject to:

- continual development via team-led committees,
- periodic audits to measure its effectiveness,
- management reviews to ensure alignment of company activities against departmental quality goals, and
- evaluation of feedback from multiple sources to improve the quality management process.

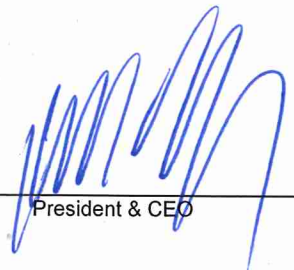

The following quality objectives are endorsed by top management:

- Maintain Atlantica's QE-MS in compliance with ISO 9001:2015 Quality Management Systems standard.
- Take effective management remedial actions on identified quality non-conformities and seek to remedy the source of those non-conformities.
- Provide QE-MS awareness inductions for all new Team Members within the company on a continual basis.
- Maintain a continuous improvement audit program.
- Ensure our QE-MS policy is reviewed on an annual basis for continuing improvement.

The QE-MS is a core infrastructure tool of Atlantica that goes beyond standard registrar compliance, adds value to our operations and thereby our customers, is accessible to those who need it and, above all, be practical.
